

The positives of technology far outweigh the negatives.

As parents, we fear the potential negative impact of social media, cyber-bullying, adult content, predators – we're confronted with so many negative headlines and frightening stories. But the internet also offers amazing opportunities for learning, having fun with friends, creating and publishing ideas, pictures and video, collaborating and enjoying music and media.

While it might be tempting to ban internet access or smartphones, this simply makes children more vulnerable when they go it alone. Just as you taught them how to cross the road safely by doing it alongside you, then taking the lead and finally doing it on their own - staying safe online needs the same approach.

“Our children are digital natives. They are so at home with technology it's like an extension of themselves.”

E-Safety

A guide for Parents and Carers

At Edwalton Primary School, we believe that the Internet and other digital technologies are very powerful resources which can enhance and potentially transform teaching and learning when used effectively and appropriately. We are committed to providing children with the tools and knowledge to stay safe on the internet, and look forward to working with Parents to ensure continuity at home as well.

Here are four key things you should consider doing at home:

Educate yourself

Go on Facebook, Twitter, Instagram, Snapchat, Vine, Tumblr, Pinterest and Pheed to find out what they are all about.

Educate your children

Talk about what you should and shouldn't share
- your name, address and any personal information

Don't say anything you wouldn't say to someone's face or that is in any way unkind

Never arrange a face to face meeting with someone you 'met' online

Make sure your children understand that their 'digital footprint' can be seen by school, universities, colleges and employers in the future so it's important to exercise caution now.

Monitor

As far as you can, engage with your children and talk about what they are doing online. Younger children should only use the internet when they are in a family area and you can keep a constant eye on what they are doing. As they get older they will demand more privacy, but it's important to stay interested. Ask them to show you their social media feeds, share yours with them, 'follow' or 'friend' them (for as long as they will let you!) and keep the lines of communication open.

Protect

There are filtering systems available that will block unsuitable content. Some are free, others you can buy (see below for links). Filtering can be very effective but no system is 100% fool proof, so Education remains key.

Support

We all make mistakes, particularly when we are young. Be approachable. Make sure your children know they can talk to you if something goes wrong. And make sure you know what to do if it does. Most sites now have 'report abuse' buttons where you can report inappropriate behaviour and your child's school should have procedures in place to deal with incidents if they occur.
